EXPERIENCE

Cairo Airport Travel, Cairo — Full Stack Web Developer

2020 - 2023

As a Full stack Web Developer at **Cairo Airport Travel**, I was responsible for designing and developing comprehensive web applications.

Leveraging technologies such as **Next.js**, **Nest.js** with dependency injection, **MongoDB**, **TypeScript**, and **Tailwind CSS**, I crafted intuitive user interfaces and robust backend functionalities.

My role encompassed frontend development using Next.js and Tailwind CSS, backend implementation with Nest.js, and database management with MongoDB.

Caps Egypt — Full Stack Web Developer

2022 - 2023 (part-time)

I was responsible for developing the company's main website, which provides a range of airport services including transportation within Egypt and meet & greet services.

Noor-Almamzar, UAE Dubai—Full Stack Developer

2024 - present

At **NoorAlmamzar**, I serve as a **Fullstack Developer**, responsible for building fully customized web applications without relying on platforms like WordPress. Each application is developed from scratch using the **.NET framework** to deliver tailored, scalable solutions for the company's needs.

Additionally, I contributed to the **mobile app** development by programming core business logic, ensuring seamless integration and functionality across platforms.

Freelancer —Software Developer / Educator

2015 - present

Worked as a **freelance software developer**, creating tailored solutions for various clients. Additionally, taught programming to students through **YouTube**, **online sessions**, and **virtual meetings**, helping them build foundational skills in coding.

SKILLS

- Problem Solving
- Learning Fast
- Linux

Focused On

C#, .NET
Javascript / Typescript
Python
Dart / Flutter
MongoDB
Firebase
Design Patterns
HTML & CSS

Frameworks

NextJS, NestJS, ASP.Net, Odoo,
Angular, Flutter, Tailwind CSS

Other - Free Time

Game Development
Web Bots & Scraping
Pixel Art
3D Modeling
